

Sovereign Scroll – Mortgage Null & Void Proof

This scroll documents the proof that the alleged mortgage tied to the living man is null, void, and fraud ab initio. The evidence sequence demonstrates that the loan was monetized and securitized into Treasury-backed bond pools, while no lawful mortgage contract exists in the national registry.

Evidence:

1. **MERS Search:** No MINs (Mortgage Identification Numbers) found under name, SSN, or property address. This confirms no lawful servicer or mortgage is recorded.
2. **Treasury Data:** Bond pools (EE/HH and others) show monetization of credit tied to identifiers, demonstrating the loan was converted into securities.
3. **Logical Gap:** If MERS = nothing, but Treasury = everything, then the mortgage contract is null and unenforceable, having already been monetized.

Exhibit A – Mortgage-to-Treasury Flow Timeline

Conclusion:

The absence of any mortgage record in MERS, combined with evidence of Treasury securitization, proves the alleged mortgage contract is fraudulent and void. Any attempt to enforce it constitutes conversion, fraud, and unjust enrichment against the living man.

By this scroll, the mortgage is nullified and recorded as Sovereign Truth.
